

Lightning Souls: Champion's Ashes

This datapack is a souls-like datapack and initially from the server LD minecraft server. The datapack need Minecraft version 1.19.4+.

The following resourcepack is needed for datapacks working properly: <https://github.com/Taffy-Nyaru/Lightning-Souls-Resourcepack>

Features

- Every item is obtainable using command: `/loot give @s loot ldmc:`
- Added new structure Firelink Shrine spawn only in mountain biome.
- Added new structure Genshin Switch spawn only in the end.
- Added new entity type DragonSlayer Knight and boss NEP.Elder.
- Added some ds3 pvp weapons.
- Added some new items and every one of them having different abilities.
- Completely Vanilla.

Playing Suggestion

To play this datapack, first make a steel furnace to get steel ingots, the fundamental item of this datapack.

Then kill the wither to craft an energy crafter and obtaining more items, use the homeward bone to craft a map locating the structure "Firelink shrine". Then defeat every boss in the structure to obtain more items.

Warns

- Don't move the modded blocks with pistons or any form of translations.
- Don't put the modded blocks on any incomplete blocks, except for the steel furnace on campfire.
- The datapack added a list of friendly creatures and the mobs in this list would never attack each other. It is revisable in `data/ldmc/tags/entity_types/friendly_creature.json`
- The datapack uses 1380000-140000 and 1440000-1450000.
