ABOUT PAGEBLOCK

Bring your PDF library into Minecraft.

WHAT IS PAGEBLOCK

PageBlock is a Minecraft mod that allows players to read **PDF** documents directly inside the game.

Whether you're following a mod guide, studying for school, reading an RPG rulebook, or keeping personal notes, PageBlock makes your documents available without ever leaving your world.

Simply import your PDF, convert it using the Press, and enjoy a smooth reading experience through Minecraft's book interface.

PageBlock was designed to make information feel like a natural part of gameplay, turning books into something useful beyond decoration.

This guide is your pocket companion for getting the most out of the mod. Keep reading to learn about every block, item, and recipe—and come back whenever you need a refresher.

HOW TO USE

From your first PDF to your first book.

Using PageBlock is simple.

1. Place your PDF files inside the pageblock folder located in your .minecraft directory.
2. Craft and place a Press.
3. Open the Press interface. Any valid PDF placed in the folder will automatically appear in the document list—no game or world restart is required.
4. Select the document you want to print.
5. Insert Paper into the Press.
6. The Press will convert the Paper into Printed Paper.
7. Combine three Printed Paper and a leather in a crafting table to create a Book containing your document.

TIP

Large PDFs may take a little longer to process the first time. Once a page has been generated, PageBlock caches it to provide much faster loading on future reads.

BLOCKS & ITEMS

Meet the tools that power PageBlock.

Press

The Press is the main workstation of PageBlock.

It scans available PDF files, displays their information, and converts them into printable pages.

Through its interface, players can browse documents, preview their contents, and begin the conversion process with a single click.

Without the Press, PDFs cannot be imported into Minecraft.

Printed Page

Contains the pages extracted from a PDF.

Each sheet preserves the original layout of the document and serves as the foundation for creating readable books.

Once produced, it can be combined with a leather to create a finished book.

Iron Gear

Is a crafting component used to assemble the Press.

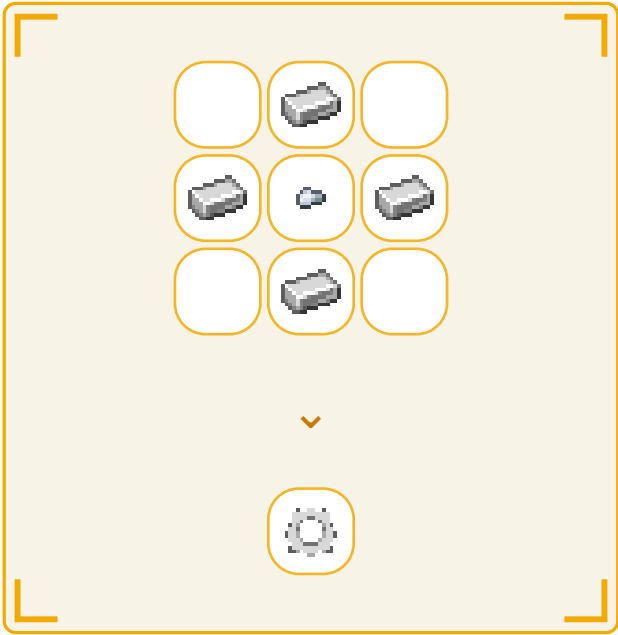

Book

Is the final component needed to bind printed pages into a complete Minecraft book.

RECIPES

Craft the tools that bring your documents to life.

Iron Gear

Book

TIP

If you are using other mods or have other item available, the recipe is also compatible. You can use jungle planks, for example.
